

ActiveState

# ActivePerl

## The industry-standard Perl distribution

ActivePerl® is ActiveState's free, ready-to-install distribution of standard Perl, for AIX, HP-UX, Linux, Mac OS X, Solaris, and Windows.

ActivePerl contains core Perl, popular modules, the all-new Perl Package Manager (PPM), and complete documentation. The Windows version provides additional features that made ActivePerl the worldwide standard for Perl on Windows.

### What's Included

**Perl** Binary distributions of core Perl 5.8 and 5.6.

**Perl Modules** Popular modules, included with all platforms. Additional platform specific modules are included with HP-UX, Mac OS X, and Windows distributions.

**Perl Package Manager** Management of local modules, installed from ActiveState's online repository of compiled CPAN modules.

**Installers** Simple setup for all platforms.

**Documentation** Complete, HTML format.

### ActivePerl Extras for Windows

**Perl for ISAPI** Simple Perl plug-in for IIS to reduce Perl interpreter load time.

**PerlEx** Perl plug-in for IIS. Cache pre-compiled scripts for improved performance.

**PerlScript** ActiveX scripting engine. Like JavaScript or VBScript with a Perl brain.

**PerlEz** Embedded Perl.

### ActivePerl Enterprise

**Guaranteed support and stability for your critical Perl installations.**

ActivePerl Enterprise is a comprehensive software, support and maintenance package for organizations of all sizes that depend on Perl. Increase efficiency and reduce costs by eliminating the need to build, test and maintain your own Perl distribution. Add our expertise to your development team and mitigate corporate risk with guaranteed ActivePerl binaries, key modules and on-demand technical support from the industry leader.

### ActivePerl OEM Licensing

**Gain competitive advantage and decrease time-to-market.**

Cost-effectively license the industry-standard ActivePerl distribution for inclusion in your products or services. OEM Licensing provides full redistribution rights, plus optional support and co-marketing packages. Gain competitive advantage and bring your applications to market faster with proven ActiveState technology.

### Latest Release

▶ ActivePerl 5.8.8.822

### What's New

- ▶ Based on Perl 5.8.8, but contains several hundred updates and bug fixes from the core Perl repository
- ▶ Bundled modules updated to the latest released versions
- ▶ Enhanced support for MinGW
- ▶ Improved Windows installers

*"ActiveState's ActivePerl implementation is generally regarded as the best available for the Win32 platform."*
